David Schraedel

(801) 921-3782 | davidschraedel@gmail.com | linkedin.com/in/david-schraedel | davidschraedel.github.io/portfolio

Versatile software professional with experience in data, cloud technologies, applied AI, and user-driven development. Reduced manual processing time by 75%+, made unstructured data queryable, and built AI features that halved user effort on core workflows.

EDUCATION

Master of Information Systems Management **Apr 2026**
Emphasis in Data Engineering and Applied AI
Brigham Young University - Marriott School of Business, Provo, UT
- Specialized Courses: AI & Agentic Systems, Data Engineering, Data Science, Cloud Engineering, Technology Sales, Product Management
- GPA 3.71

Bachelor of Science in Information Systems, Minor in Family Life **Apr 2023**
Brigham Young University - Marriott School of Business, Provo, UT

TECHNICAL SKILLS

Data: Python, SQL, Snowflake, dbt, Prefect, R (Tidyverse), scikit-learn, Pandas, NumPy, dimensional modeling, Tableau, Power BI, NoSQL, MySQL, EDA, ELT/ETL, Excel, lakehouse architecture
Development: Docker, JavaScript, Git, Linux, agentic coding, HTML, CSS, React, Langchain, APIs, .NET, C#, Playwright, dbt tests
Cloud & Infrastructure: AWS (EC2, S3, VPC, IAM, RDS, Lambda, DynamoDB, CloudWatch, CodePipeline), Terraform

PROJECTS

- **Data:** Built a Snowflake/dbt pipeline unifying 3 source systems (Python, Prefect, Docker), with 27 dbt tests, dbt Cloud CI/CD, and an MCP server for AI agent access
- **Data:** Built ELT pipeline for 6.7M+ words of transcript data (Python), enabling queries and Markdown exports for LLM analysis
- **Forecast:** Built a time-series forecasting pipeline in R using tidymodels, evaluating ARIMA, XGBoost, and Prophet models and deploying predictions through a Dockerized REST API
- **Automation:** Built a Python script to auto-populate photo book templates, reducing 30+ manual hours to 5–8 hours total
- **AI:** Partnered with local business to design and test agentic AI systems, identifying opportunities to reduce workflow friction

EXPERIENCE

Full-stack Developer (Capstone Project) **Jan 2026 - Apr 2026**
I AM Scale, Lehi, UT
- Resolved ECS service-to-service auth failures by designing and validating scoped IAM policies in Terraform
- Integrated Amazon Bedrock LLM APIs for the core workflow, optimizing metadata for retrieval accuracy.
- Diagnosed and fixed React Query cache issues causing cross-account data leaks and stale inbox filtering

Data & Systems Teaching Assistant **Sep 2025 - Dec 2025**
BYU Marriott Department of Information Systems, Provo, UT
- Taught core concepts for 50+ students in TA labs and exam reviews (Excel statistics, Tableau, data lifecycle/quality, flowcharts)
- Debugged SQL, VBA, HTML/CSS, Excel, and Tableau issues to resolve students' technical roadblocks and grading inquiries

UX & Web Developer **Aug 2024 - May 2025**
The LTN Foundation (Nonprofit), Orem, UT
- Built a relational database (Supabase/PostgreSQL) from scratch, establishing authentication and dynamic content architecture
- Built a responsive, accessible website (React, JavaScript, HTML/CSS) for the organization's educational content delivery

Web Development Intern **Apr 2024 - Sep 2024**
OCSC (Early-stage Startup), Bountiful, UT
- Delivered 20+ production-ready features (React, JavaScript, HTML/CSS) to expand functionality of a SaaS marketplace web app
- Implemented authentication and CRUD functionality, enabling reliable product demos for prospective clients/investors

Contemporary Dance Accompanist **Apr 2019 - Apr 2023**
BYU Department of Dance, Provo, UT
- Delivered live music for 15 to 75 dancers using music technology and 13 instruments to support seamless instruction
- Fostered strong partnerships by adapting to the schedules and styles of 11 instructors and reciprocally mentoring 6 peer musicians

Consulting Intern **Sep 2022 - Dec 2022**
The Church of Jesus Christ of Latter-day Saints - Social Impact Project, Salt Lake City, UT
- Identified data source constraints for a humanitarian crisis response tool, translating limitations into actionable recommendations
- Managed cross-functional syncs with Kanban (Trello), serving as technical liaison between GIS experts and the org's stakeholders
- Designed and presented a prototype (Esri, ArcGIS), surfacing key constraints and opportunities before further investment

OTHER ACHIEVEMENTS

Awards: BYU IS Alumni Choice Award for Integrity in Action (2023), Eagle Scout (2015)
